PREMIUM EGYPTIAN

Sweet Potatoes

BEAUREGARD + BELLEVUE + WHITE FLESH

FROM OUR SOIL TO YOUR PORT

RADIXNILE.COM

Growers first. Not traders.

RadixNile is an Egyptian grower-exporter that has chosen to specialise in one crop: the sweet potato. We grow three varieties to our own programme, cure and grade them at harvest, wash and sort them on our own line and load them reefer for your port — so we can answer for the calibre in every box we ship.

ONE FAMILY OF GROWERS

A NEW CHAPTER

Rooted in experience.

Building on our success in growing garlic and onions with AL NOUREEN FOOD and AL ROFAN FOOD, we founded RadixNile to specialise in sweet potatoes — grown to our programme, prepared in our own packing facilities and controlled from seed to export.

The same family, the same fields know-how and the same standard — now focused on a single crop, so every container matches the last.

03 IN THE FIELD · SEPTEMBER 2026

Real fields. Real harvest.

Every photograph in this catalogue is our own — our fields, our crates, our people. What you see here is what arrives at your port.

Three varieties. One standard.

Beauregard

DEEP ORANGE FLESH

The world's best-known orange sweet potato. Rose-copper skin, deep orange flesh, sweet and moist when cooked.

Bellevue

BRIGHT ORANGE FLESH

Smooth copper skin and uniform, well-shaped roots. Its season hands over with Beauregard, so orange supply never stops.

White flesh

CREAMY WHITE FLESH

Red-purple skin and creamy white flesh with a firmer, drier texture — for markets that ask for a white sweet potato.

Supplied all year. Our varieties hand over to one another across the season, backed by cured, controlled storage — volumes and calibres confirmed at quotation.

Sized to your count.

Graded at harvest, re-checked on our line and labelled crate by crate — the same M, L1, L2 and XL you see here.

GRADED IN THE FIELD RE-CHECKED ON OUR LINE LABELLED CRATE BY CRATE CUSTOM CALIBRES ON REQUEST

Seed to shipment, under one roof.

01

Grown

To our own programme, three varieties in rotation, under real Egyptian growing conditions.

02

Cured & graded at harvest

Cured to set the skin, then sorted into crates by size in the field — each lot labelled and dated.

03

Washed

Washed or unwashed, as you prefer — spray-washed and graded on our own line to Class I.

04

Hand-sorted & packed

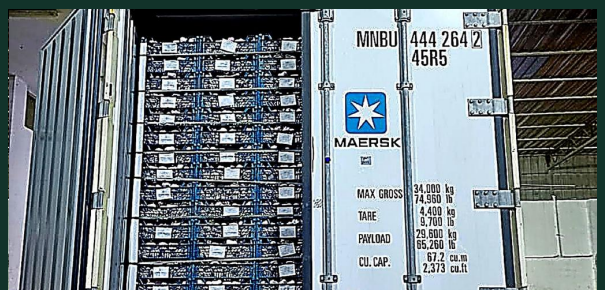

Checked by hand and packed to your calibre, count and label.

05

Loaded

Held at 13–14 °C and loaded reefer at Alexandria or Damietta for long-haul shipping.

07 PRODUCT SPECIFICATION

Fresh Egyptian sweet potatoes.

ORIGIN	Egypt · grown and controlled by RadixNile
VARIETIES	Beauregard and Bellevue (orange flesh) · white flesh
SUPPLY	All year — varieties in rotation, backed by cured, controlled storage
